Mar.	✓	Safety training Preparation of LFS swimming competitino
Apr.	✓	Safety training and service (reminders) Case study
May	✓	Safety training and service (reminders) Case study
Jun.	Pending	Aftermath of the school year Overview of next school year

AROUND SCHOOL:

Visit to the Qingpu traffic police dept. in April.

Goal: to place bumpers (high concrete or low yellow) along Gaoguang Rd., to help decreasing speed.

Outcome: these bumpers cannot be placed on such a road, according the Chinese regulation.

What is **possible** is to have « Warning: school » signs placed on the both sides of the school, in order to attract attention on safety.

OTHER PROJECTS:

In March/April: organization by LFS of an international swimming competition, involving 12 schools (over 300 pupils) plus LFS and DSS

Constraint: guests were living in families, which brought a heavy pressure on the bus network

Work done: a temporary network with additional lines was created in less than 2 weeks, without disturbing the existing one

Result: some delays, but overall, no security problem and a good level of satisfaction

Q&A:
